Legacy Clinic

Fall Party planned for September 2017

Come and meet Drs. Sandra Buys, Sarah Colonna, and Caren Frost! We are planning a science day at the Legacy Girls clinic. More information will be provided late summer.

What's going on with the Legacy Girl's Study??

We will continue to offer the "optical breast spectroscopy" or "light test" to all LEGACY girls ages 10 and older. Karen will show you the machine and what we will do when you come in for your visit. Thank you all for your dedication-we enjoy seeing you so much!

Cathy and Karen
